WORK EXPERIENCE

Enterprise Architect
2024 – Present   *@ING*

As an Enterprise Architect at ING, I lead the design and implementation of a robust, scalable Gateway and connectivity framework for Payment and Settlement Services (PSS), ensuring efficient, secure financial transactions across a global network. I oversee the strategic integration of SWIFT capabilities, optimizing global financial operations and secure communication. Collaborating with a team of architects, I drive technological advancements that promote financial inclusivity and set industry benchmarks through innovative banking solutions.

Lead API & Integration Architect
2022 – 2024   *@LeasePlan Digital / Ayvens*

As LeasePlan Digital's Lead API & Integration Architect, I guided an 11-member team in implementing strategic API initiatives, defined API strategy, ensured secure API communication, and designed integration landscapes. I consistently fostered a future-proof integration architecture by delivering innovative solutions and streamlining practices.

Founder
2022 – Present   *@Alroze Technologies*

As the Founder of Alroze Technologies, I provide tailored consulting services, primarily in the domains of software architecture, software development, and 3D printing.

Solutions/Domain Architect
2020 – 2022   *@ING*

As a Solutions/Domain Architect within Banking Technology Platform, I have been the responsible architect of Open Banking enabling ING becoming a platform bank of the future. In addition to my role as Open Banking Architect, I have also contributed to the Banking Technology Platform Architecture.

Consumer Engineer
2019 – 2020   *@ING*

In my role as a Consumer Engineer of Touchpoint Platform at ING, I collaborate with diverse stakeholders to build effective, reusable solutions primarily through makeathons and PoCs, simultaneously driving platform enhancements based on consumer experiences. Additionally, I standardize existing and emerging consumer patterns for the platform.

Dev Engineer IT Innovation
2016 – 2019   *@ING*

As a key member of IT Innovation, I have worked in designing and implementing the global API Management Solution as the Product Owner in collaboration with many ING colleagues around the World and afterwards as the Product Owner of API Design and Governance.

Sr. Software Engineer & Software Architect
2012 – 2016   *@ING Turkey*

Software Development Specialist
2011 – 2011   *@STRATEGIA IT*

Engineer & Analyst Developer
2010 – 2011   *@Turkish Airlines*

EDUCATION

Computer Engineering B.A.
2007-2011   *@Halic University*
